Bryce Resort Ski Team: Profile Setup & Registration Guide

Nov 12, 2026

Bryce Resort Ski Team registrations are bought online at shop.bryceresort.com in four steps. The screenshots show a member registering two participants as an example; non-members follow the same steps, with the differences noted along the way.

Waivers: An assumption of risk waiver must be signed for each participant at the time of purchase, during checkout and before you can pay (Step 4).

Before you start

Members already have an account and profiles. You just need the email address and password for the account tied to your membership. **You must be logged in** before you buy, so the system can match the registration to your membership.

Non-members will register a new account, then create a profile for themselves and one for each participant. Have these ready:

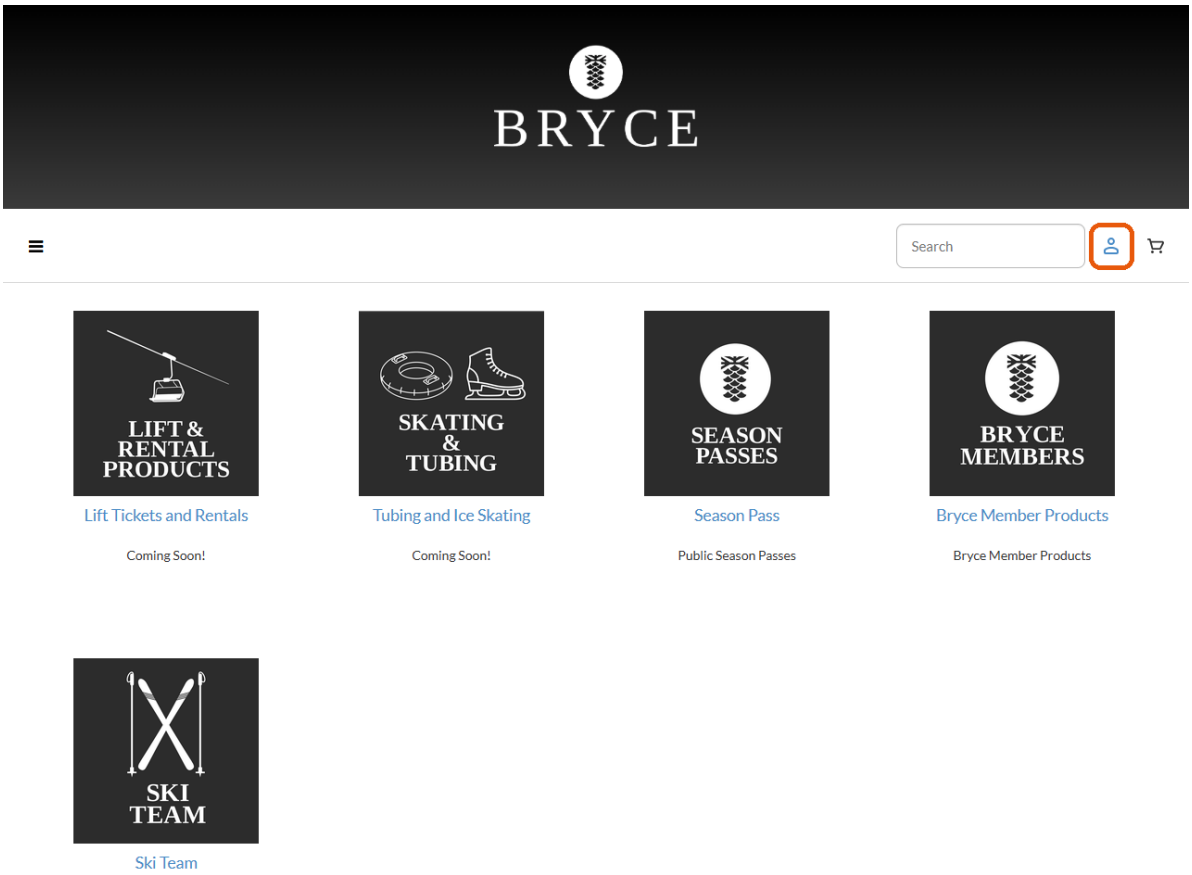
- One primary email address for the account. If one parent is paying for the whole family, set up everyone under this single account and email so all registrations are managed and paid together. This is meant for families, not for unrelated groups
- Full name and phone number, plus each participant's birth date (required)
- Home address, town, state and zip code
- A clear photo of each participant for their profile picture (required)
- A payment card

Everyone: don't add anything to your cart until your own profile and every participant's profile are fully set up with a picture and birth date (Step 2).

> **Birth date format: YYYY-MM-DD**
> When you create each participant's profile, type the birth date as the year, then month, then day, with dashes. For example, a participant born January 25, 2014 is entered as **2014-01-25**.

Step 1: Log in or register

1. Go to shop.bryceresort.com and select the **person icon** at the top right of the store.



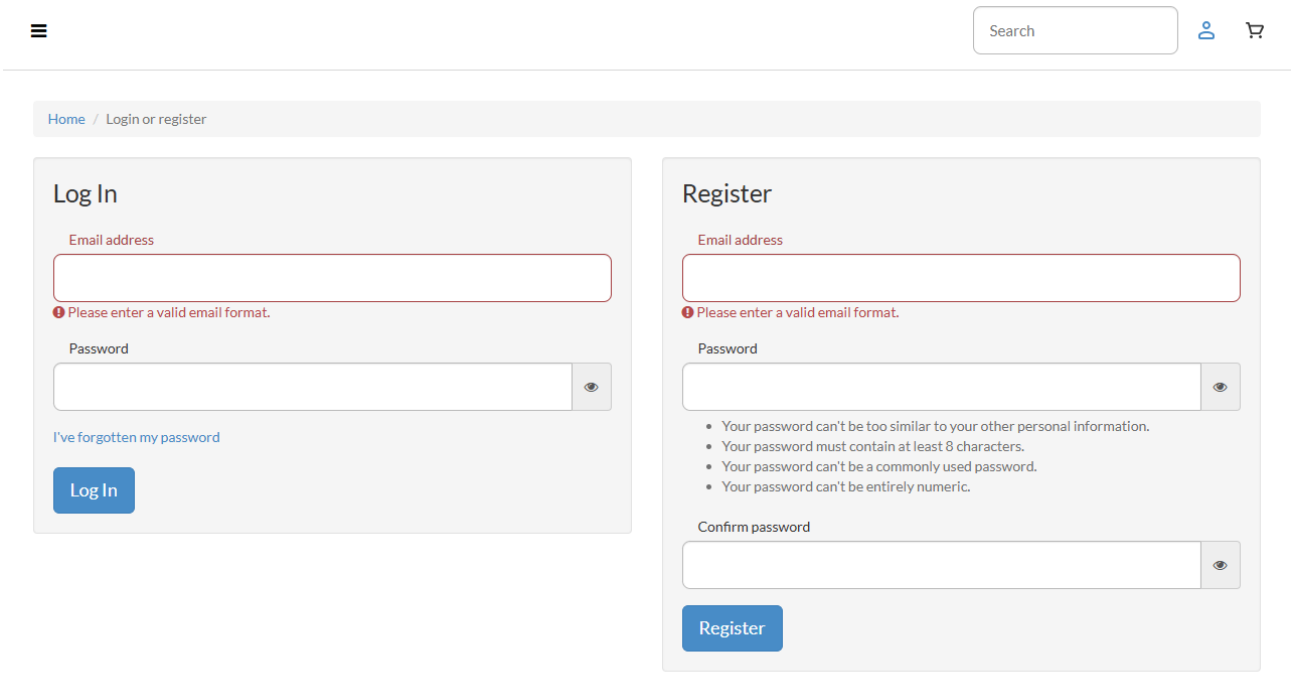
Screenshot for Step 1.1: select the person icon to log in or register.

2. **Members:** under **Log In**, enter the email address and password for your membership account and select **Log In**. Then go to Step 2.

   Non-members: under **Register**, enter your email address, a password, and the same password again under **Confirm password**. The password must:

   - Contain at least 8 characters
   - Not be entirely numbers
   - Not be a commonly used password
   - Not be too similar to your name or other personal information

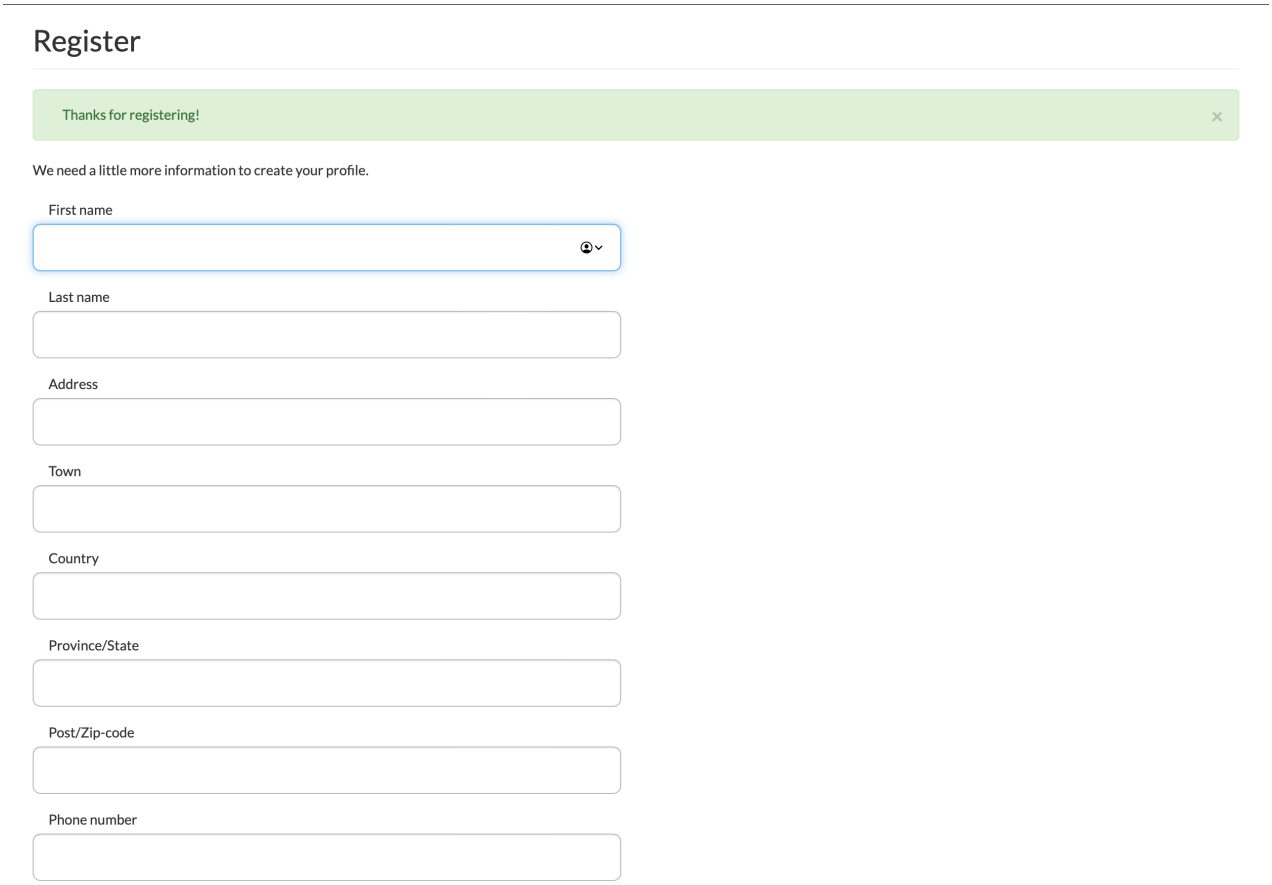
   Then select **Register**.



Screenshot for Step 1.2: members use Log In on the left; non-members use Register on the right. The red "Please enter a valid email format" notes go away once you type your email.

---

3. **Non-members only:** on the **Thanks for registering!** page, fill in your first name, last name, address, town, country, state, zip code and phone number, then submit the form.



Screenshot for Step 1.3: fill in your profile details.

Step 2: Set up all profiles

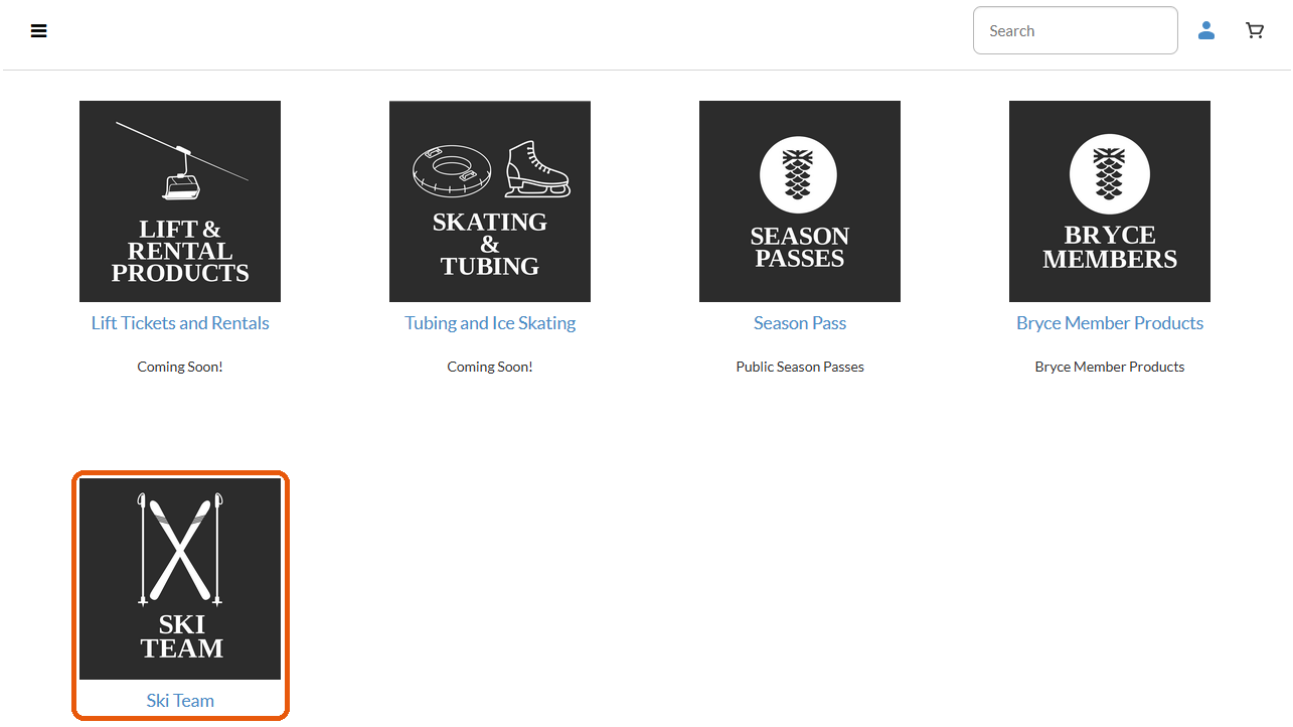
Set up every profile before adding anything to your cart. Right after you register or log in, make sure your own profile and every participant's profile are complete, with a picture and birth date saved. Each registration is tied to one participant's profile, and each participant needs their own registration.

1. **Non-members:** select **Edit Profile** on your own profile and add your picture and birth date. Then select **Add Profile** and create a profile for each participant with their details, picture and birth date. Select **Save** after each one.
2. **Members:** select **Edit Profile** on each participant's profile to confirm their picture and birth date are saved. Use **Add Profile** for anyone new. Select **Save** after each one.
3. **Picture:** under **Picture**, select **Edit** and upload a clear, front-facing photo. **Birth date:** click into the field and type the date as **YYYY-MM-DD**. If you use the calendar icon instead, it opens on today's date: click the month heading, click it again to see a block of years, use the **<** arrow to go back to the birth year, then click the year, month and day.

If red text says to **edit the profile and try again**, the profile is still missing something, usually the birth date or picture. Select **Edit Profile**, fill in the gap and save.

Step 3: Choose the program and attach a participant to each registration

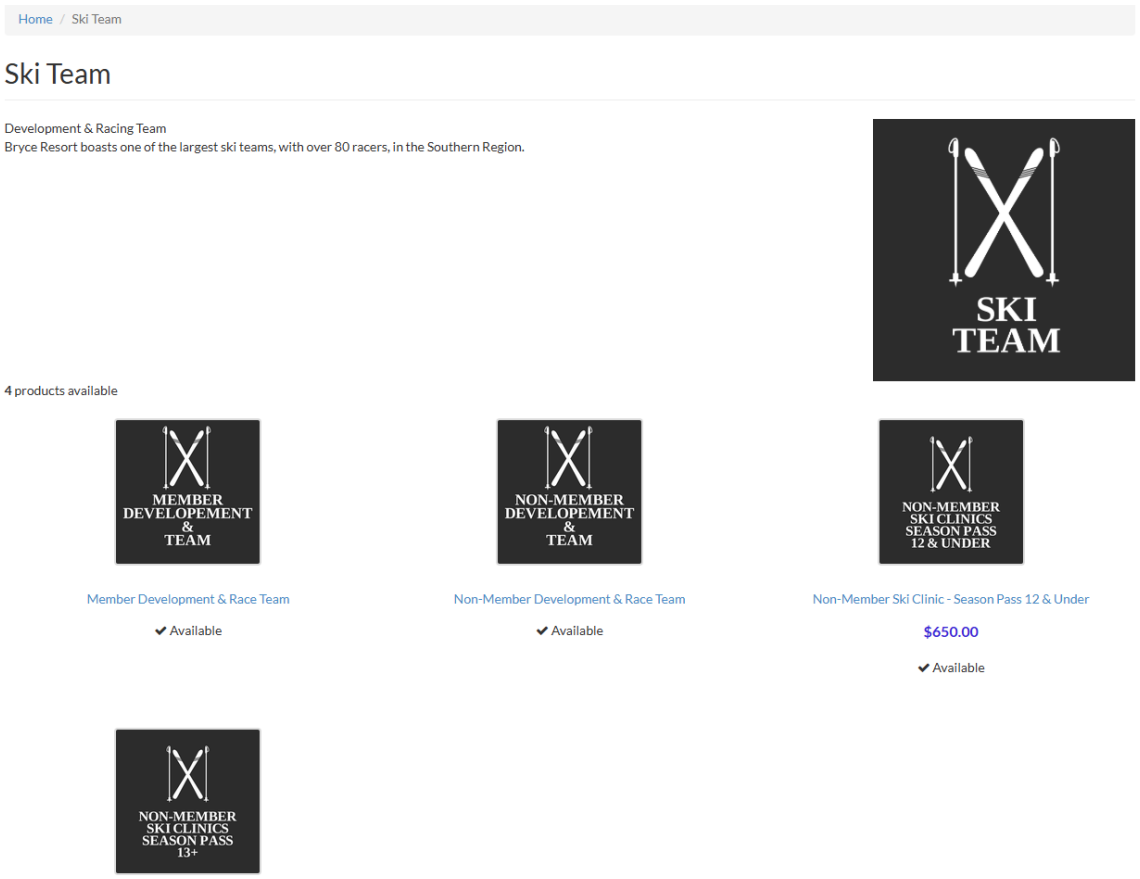
1. Once all profiles are set up, select the **Home** link at the top left of the page (just above the page title) to go back to the main store. The person icon at the top right turns solid blue when you're logged in. Then select the **Ski Team** icon.



Screenshot for Step 3.1: select the Ski Team icon.

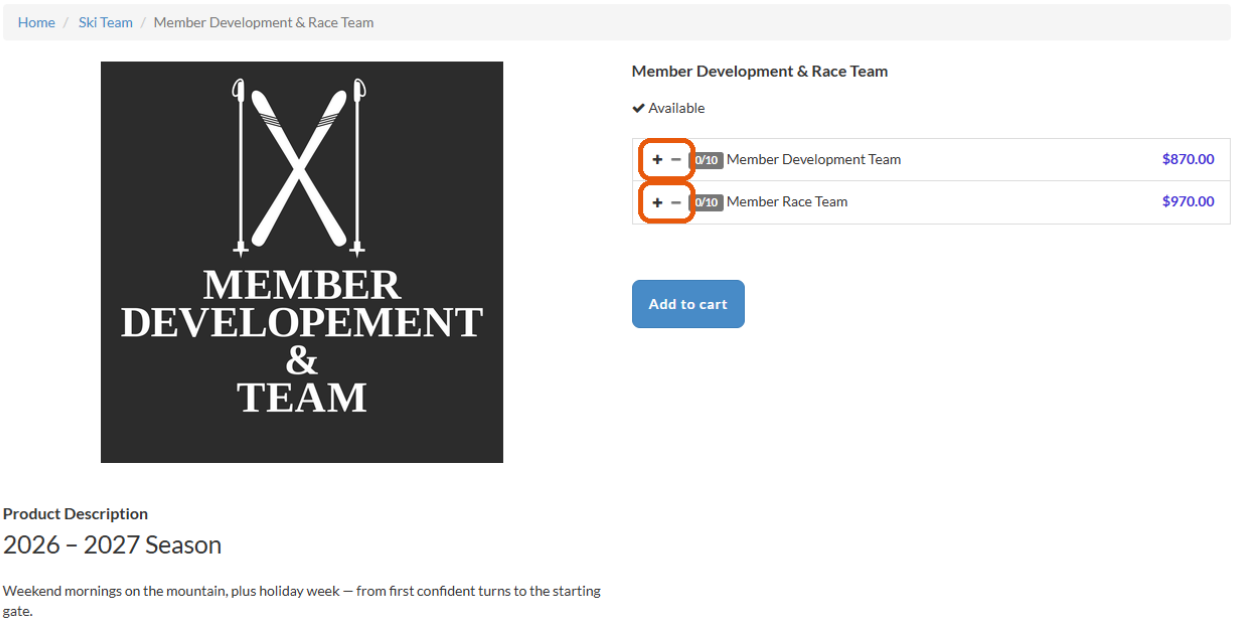
2. Select the product you're buying:
   - **Members:** Member Development & Race Team.
   - **Non-members:** Non-Member Development & Race Team first. After that's in your cart, add the Non-Member Ski Clinic season pass for your participant's age (**12 & Under** or **13+**).

Non-members: order matters. The Ski Clinic season pass can't be added until a Non-Member Development & Race Team registration for that participant is already in your cart. Finish Steps 3.3 to 3.5 and Step 4.1 for the Development & Race Team product, then come back to Ski Team for the season pass.



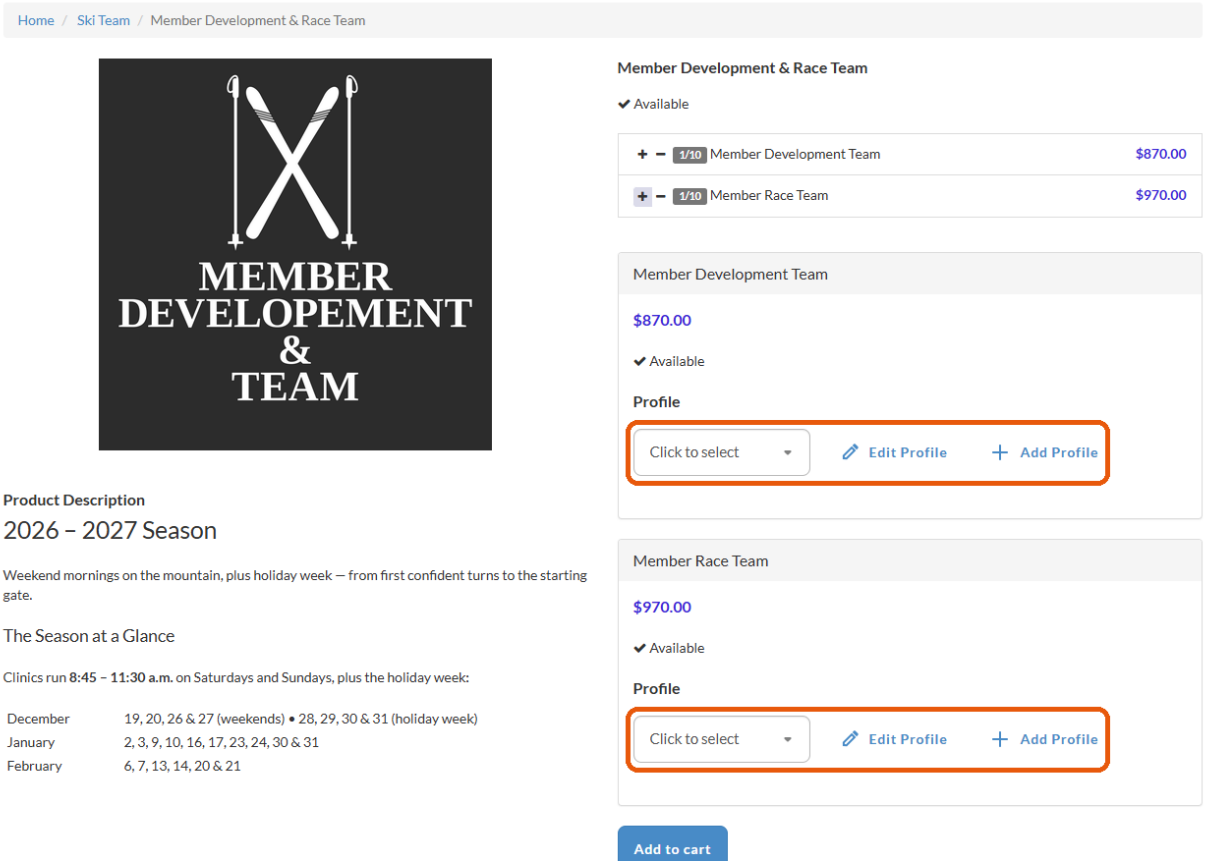
Screenshot for Step 3.2: the Ski Team products.

3. Next to each program, select **+** once for every participant you're registering in it (select **−** to take one back off). The counter, for example **1/10**, shows how many you've selected. A box with its own **Profile** section appears below for each one.



Screenshot for Step 3.3: use + and − to choose how many participants for each program.

4. In each box, select **Click to select** and choose the participant that registration is for. If a profile is missing its picture or birth date, use **Edit Profile** to finish it before going on.



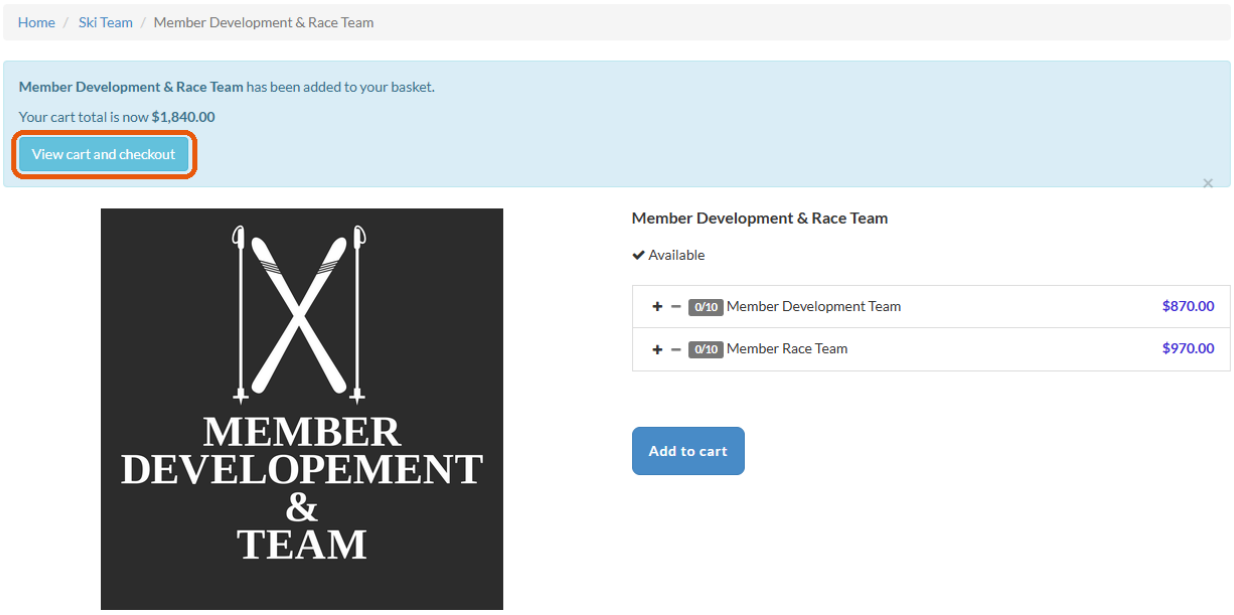
Screenshot for Step 3.4: choose a participant in every Profile section.

Check every box before you add to cart. Each box must have a participant selected, and it must be the person actually attending that program. For example, if one child is on the Development Team and another is on the Race Team, choose the first child in the Development Team box and the second child in the Race Team box.

5. Select **Add to cart** at the bottom of the page. If you added several participants, you may need to scroll down past the last box to find it.

Step 4: Check out

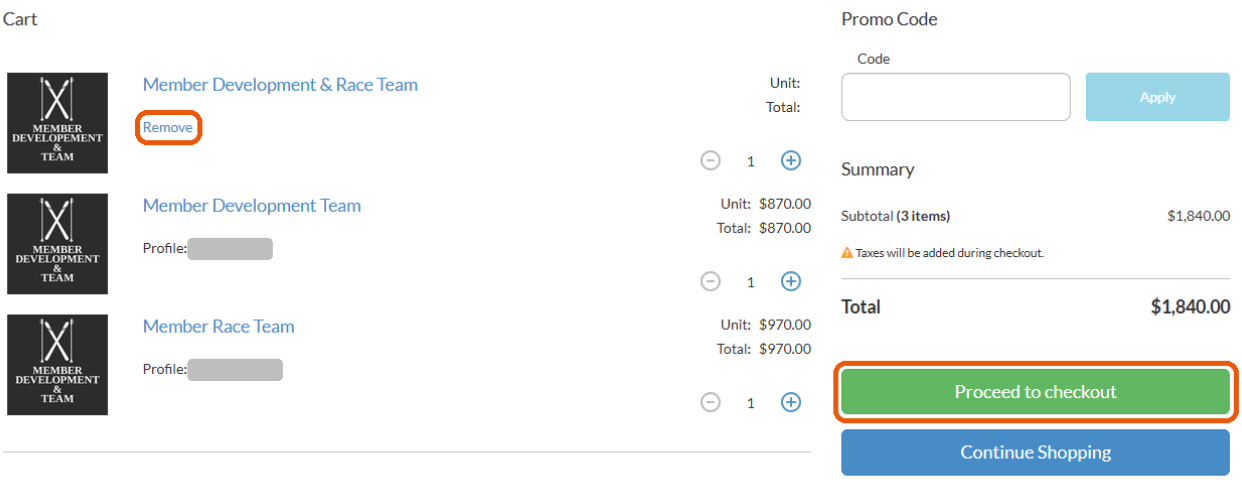
1. A blue banner confirms the registrations were added and shows your cart total. Still need another product (for example, a non-member's Ski Clinic season pass)? Select **Ski Team** at the top of the page and repeat Step 3. When everything is added, select **View cart and checkout**.



Screenshot for Step 4.1: the blue banner confirms the items are in your cart.

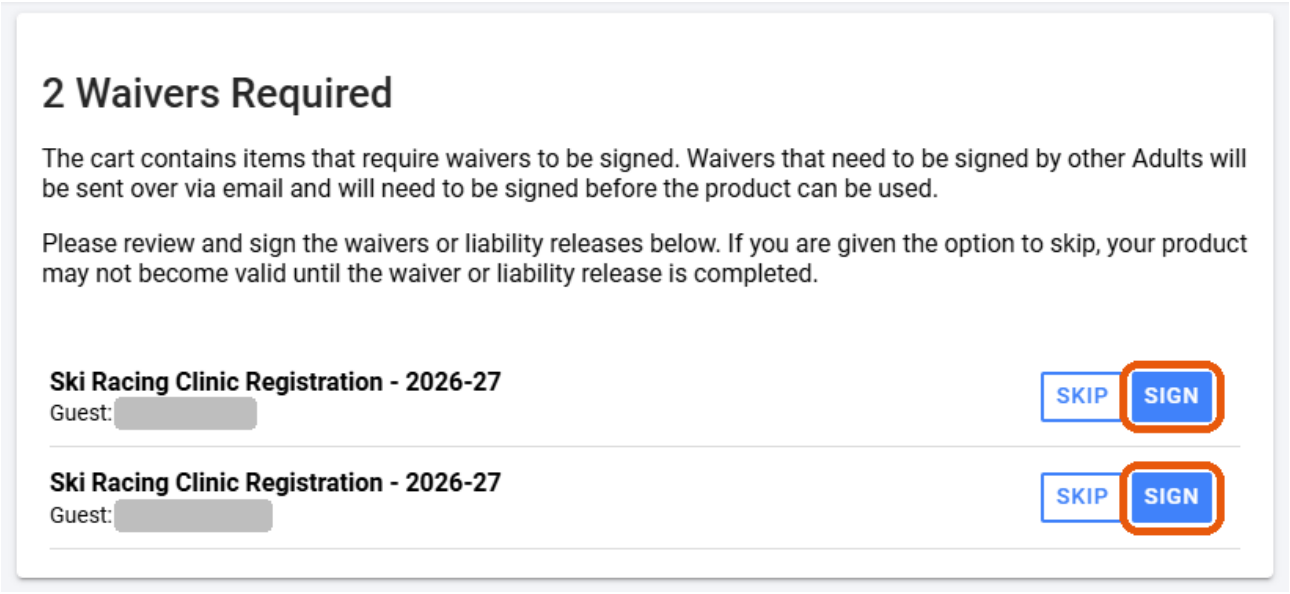
Removing an item: after you add to cart, the + and − counters on the product page reset to 0, and using − there does not take anything out of your cart. To remove an item, select **Remove** on the cart page.

2. On the cart page, check that each registration shows the right participant under **Profile:**. The product you chose (for example, Member Development & Race Team) appears as its own line, with each participant's registration listed below it, so it is included in the item count. Then select **Proceed to checkout**.



Screenshot for Step 4.2: check the participant name on each registration (hidden here for privacy), use Remove if needed, then select Proceed to checkout.

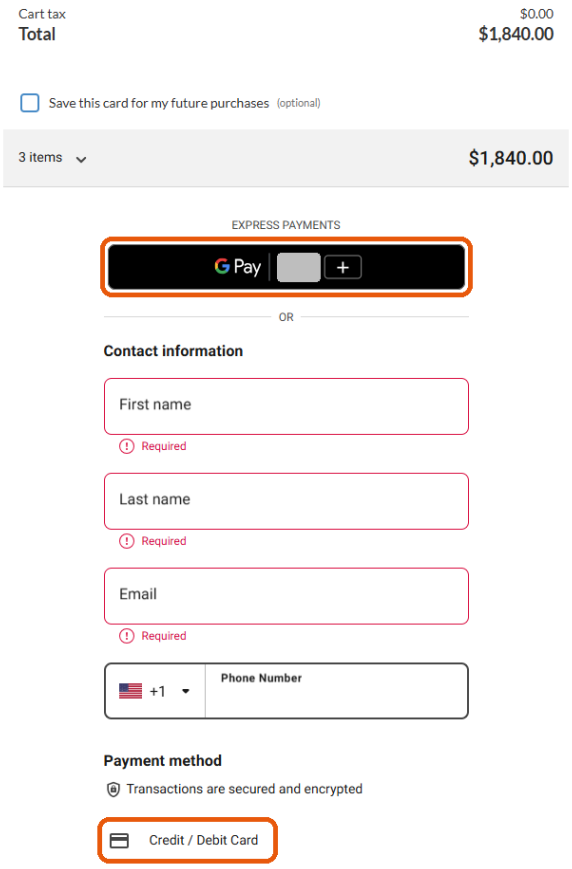
3. The next screen lists the assumption of risk waivers that must be signed, one for each participant. Select **SIGN** next to each waiver and complete it. Every waiver must be signed now, at the time of purchase, before you can go on to payment, so don't select **SKIP**.



Screenshot for Step 4.3: select SIGN for each participant's waiver (names hidden here for privacy).

4. On the payment page, check the total (select **3 items**, or however many you have, to see what's included), then pay one of two ways:
   - **Express Payments:** select **Google Pay** or **Apple Pay** (which one appears depends on your device and browser) and follow the prompts.
   - **Credit / Debit Card:** fill in your first name, last name, email and phone number under **Contact information**, then select **Credit / Debit Card** under **Payment method** and enter your card details. The red "Required" notes go away as you fill in each field.

   Checking **Save this card for my future purchases** is optional. Taxes, if any, are shown with the total.



Screenshot for Step 4.4: pay with Google Pay or Apple Pay under Express Payments, or fill in your contact information and choose Credit / Debit Card.
